💼 Professional

(Regular/Mid) Python Backend Developer
STX Next / Wrocław, Lower Silesia, Poland

I was responsible for creating and maintaining REST APIs, as well as creating and maintaining microservices. Working on daily basis with UK-based client creating a CMS platform for managing marketing-related assets using Vidispine and Amazon Web Services (AWS) in connection with in-house developed and maintained microservices. I was also responsible for creating and maintaining a CI/CD pipeline (GitHub Actions) for the project. After a few months, original project was marked as End of Life (EOL) and I was moved to a new project under the same client, where I was responsible for creating and maintaining backend services using Azure Functions and also migrating some existing code from Azure Logic Apps to Azure Functions as well as working closely with the Azure API Management service and DevOps client's team.

Sep 2021 - Present
